

As a Wisconsin resident I am very concerned that the FCC would even consider putting the interest of telemarketers before that of Wisconsin residents/consumers. Having the Wisconsin No Call List and it's strict laws has improved the quality of life, for all Wisconsin residents, especially our senior population. Those registered on the no call list no longer are plagued with unwanted calls at any hour of the day, nor do we have to deal with overly insistant telemarketers. Please do not weaken the Wisconsin No Call List law.
